

OfficeMitra — Install and launch (Windows and Mac)

SanMitra

Tech Solutions

SanMitra Technologies

- **Website:** <https://www.sanmitratech.in>
- **Support email:** [contact@sanmitratech.in](<mailto:contact@sanmitratech.in>)

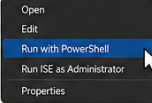

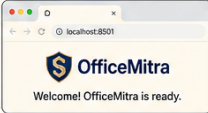

This guide is for **non-technical users**. You do **not** need to install Python. The full manual is in [CLIENT_MANUAL.md](#).

Your data stays on your computer. OfficeMitra reads exported journals. It does not log into Tally, Zoho, or Busy, and it never writes back.

Windows 10 or 11

**SanMitra**
TRUST · COMPLIANCE · GROWTH

Install OfficeMitra on your PC

-  **1 Unzip SSDV folder**
Extract the downloaded SSDV folder to any location on your PC.
-  **2 Install Python 3.11 if needed**
If Python 3.11 is not installed, download and install it from python.org
Python 3.11
-  **3 Right-click install.ps1 Run with PowerShell**
Right-click the file install.ps1 and select "Run with PowerShell".
-  **4 Double-click Start OfficeMitra**
Double-click the Start OfficeMitra file to launch the application.
-  **5 Browser opens localhost 8501**
Your default browser will open and OfficeMitra will be ready to use.

**SanMitra**
TRUST · COMPLIANCE · GROWTH

Smarter Tools. Stronger Compliance.
Better Growth.

Install

1. Download **OfficeMitra-Setup.exe** from SanMitra (purchase email or website).
2. Double-click the file. If Windows SmartScreen appears, choose **More info** → **Run anyway**.
3. Click **Next** → **Install**.
4. Tick **Launch OfficeMitra** at the end, or use the **OfficeMitra** icon on your desktop.

Daily use

1. Double-click **OfficeMitra** on the desktop (or Start menu).
2. A small window opens — **leave it open** while you work.
3. Your browser opens the dashboard. Use **Setup** to connect Tally or upload CSV/XML.
4. To quit: close the browser tab, then close the OfficeMitra window.

If the browser does not open, go to **http://localhost:8501**.

Portable zip (no installer)

1. Unzip **OfficeMitra-windows.zip**.

2. Double-click **OfficeMitra.exe**.

Mac (macOS 12 Monterey or later)

Install

1. Download **OfficeMitra.dmg**.
2. Double-click the disk image.
3. Drag **OfficeMitra** into **Applications**.
4. Eject the disk image.

First open (unsigned build)

Apple may say the app is from an unidentified developer:

1. In **Applications**, **right-click** (or Control-click) **OfficeMitra**.
2. Choose **Open**.
3. Confirm **Open**.

You only do this once.

Daily use

1. Open **OfficeMitra** from Applications, Launchpad, or Spotlight.
2. Leave the small status window open.
3. Safari or Chrome opens the dashboard at **http://localhost:8501**.
4. To quit: close the status window (or **OfficeMitra** → **Quit**).

Where your books are stored

System	Folder
Windows	`C:\Users\\AppData\Local\OfficeMitra\data`
Mac	`~/Library/Application Support/OfficeMitra/data`

The vault file is **ssdv_connect.sqlite** after you import your company.

Email	contact@sanmitratech.in
Website	https://www.sanmitratech.in

When emailing support, include your Windows or Mac version, what you were doing, a screenshot, and whether you use Tally, Zoho, Busy, or Excel.

Developers only (source + Python)

Contributors can still use the repo: install Python 3.11+, run `install.ps1` (Windows) or `pip install -e ".ui]", then ssdv ui. See \[installer/README.md\].`

OfficeMitra is part of the SanMitra SSDV product family. Read-only analytics from posted journals.
